COURSE DESCRIPTION

In this "Sensory Enlightenment Advanced Workshop", we will be learning how to directly contact the Divine. There are many aspects of the Enlightened experience that are being made available for the first time. On the deepest level, the Sensory Enlightenment Advanced Workshop is simply your Soul speaking to It self. The course is just a cover. The workshop is there just to pacify your mind. It is not the workshop; rather, it is the state that it will bring you to that is important. The workshop is a kind of gateway. There is a silence associated with it that is significant. If you come to the workshop, just know that you will gain a foothold in the area beyond your mind.

You will come to know your Soul intimately. You will come to know your inmost Self. You will taste eternity. You will gradually awaken from a million lifetimes of sleep and you will know your Divinity. In the end, you will come to live the wisdom of the Saints from time immemorial.
